

Procreate Installation

STEP BY STEP INSTRUCTIONS:

- 1** Open the Files app on your iOS device and navigate to the folder where you saved your download.
- 2** Tap to open the ZIP file if you haven't opened it already. You can then tap the BRUSHSET file to import your new brushes into Procreate.
- 2** If that doesn't work, tap and hold on the file until you get the share dialog or choose "Select," tap on the brush file and choose "Share" from the bottom menu.

- 3** You should then see the Procreate icon in your actions panel. Tap on the icon and your new brushes will immediately be imported into your Procreate brush library. Enjoy!
